A new Windows experience

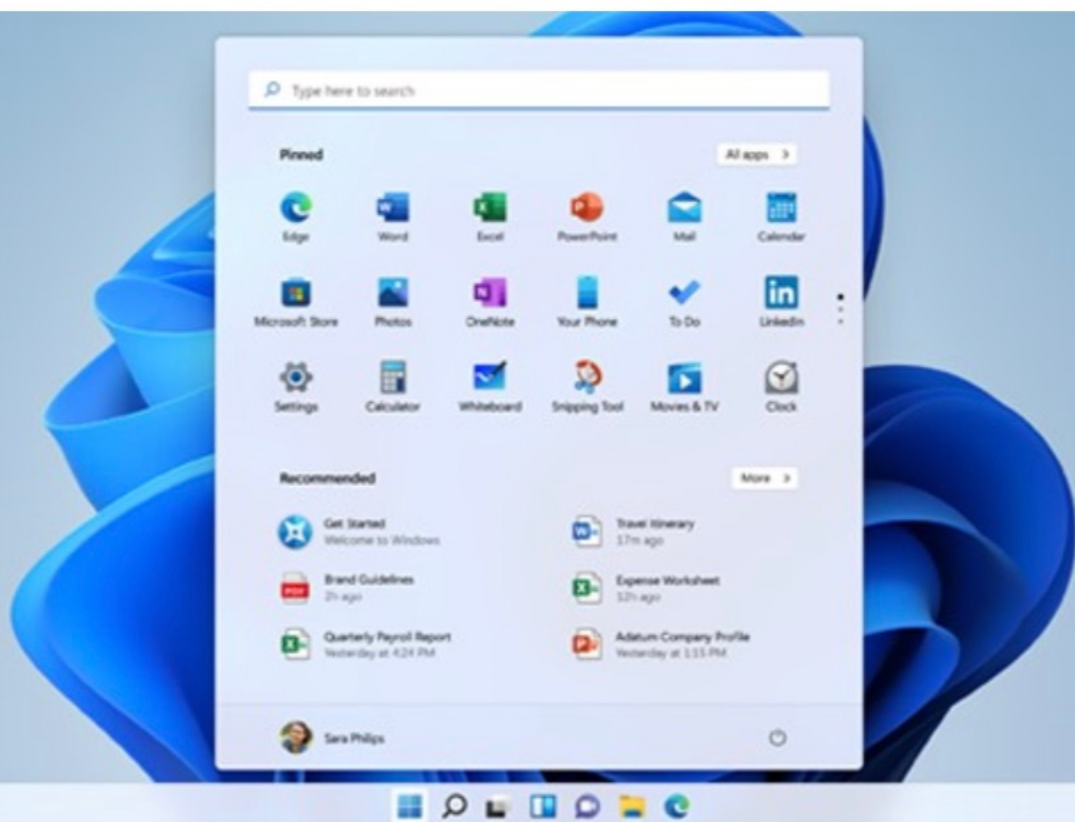

The way we've used our PCs has changed. They've become the place we go to for meetings, classes, getting things done, having fun, and staying connected. So much so, they've become that familiar place we call home.

Introducing Windows 11, the Windows that brings you closer to what you love.

Take a look at the video above and read on to learn more.

Get a fresh perspective

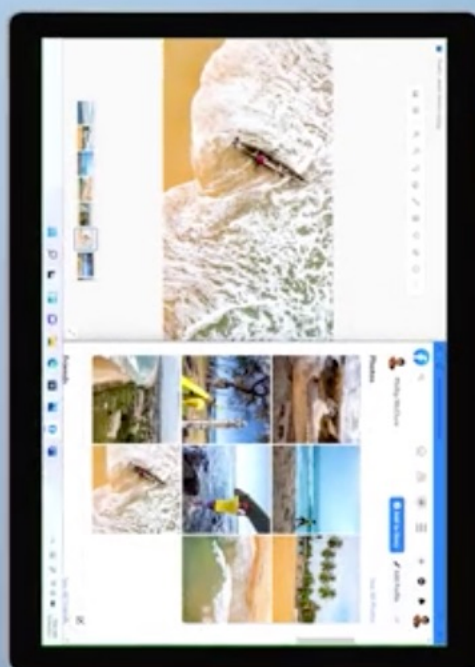

Windows 11 provides a calm and creative space where you can pursue your passions through a fresh experience.

From a **rejuvenated Start menu** to new ways to connect to your favorite people, news, games, and content—**Windows 11 is the place to think, express, and create in a natural way.**

Maximize your productivity

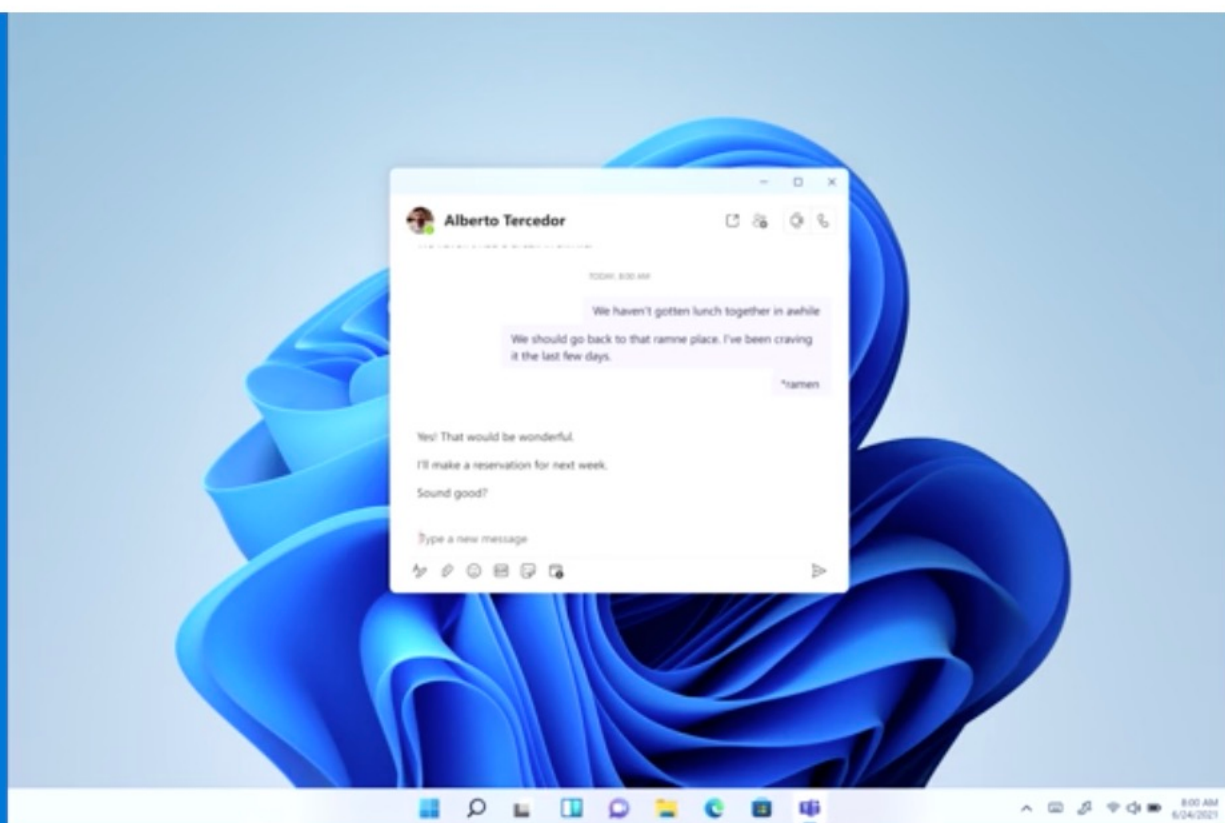

Turn down the noise and chaos with the ability to organize your windows, optimize screen space, and get more done with **Snap Assist**.

And then access all the apps you need and multi-task with tools like **Snap layouts**, the ability to create **separate Desktops**, and a **new more-intuitive redocking** experience.

New ways to connect

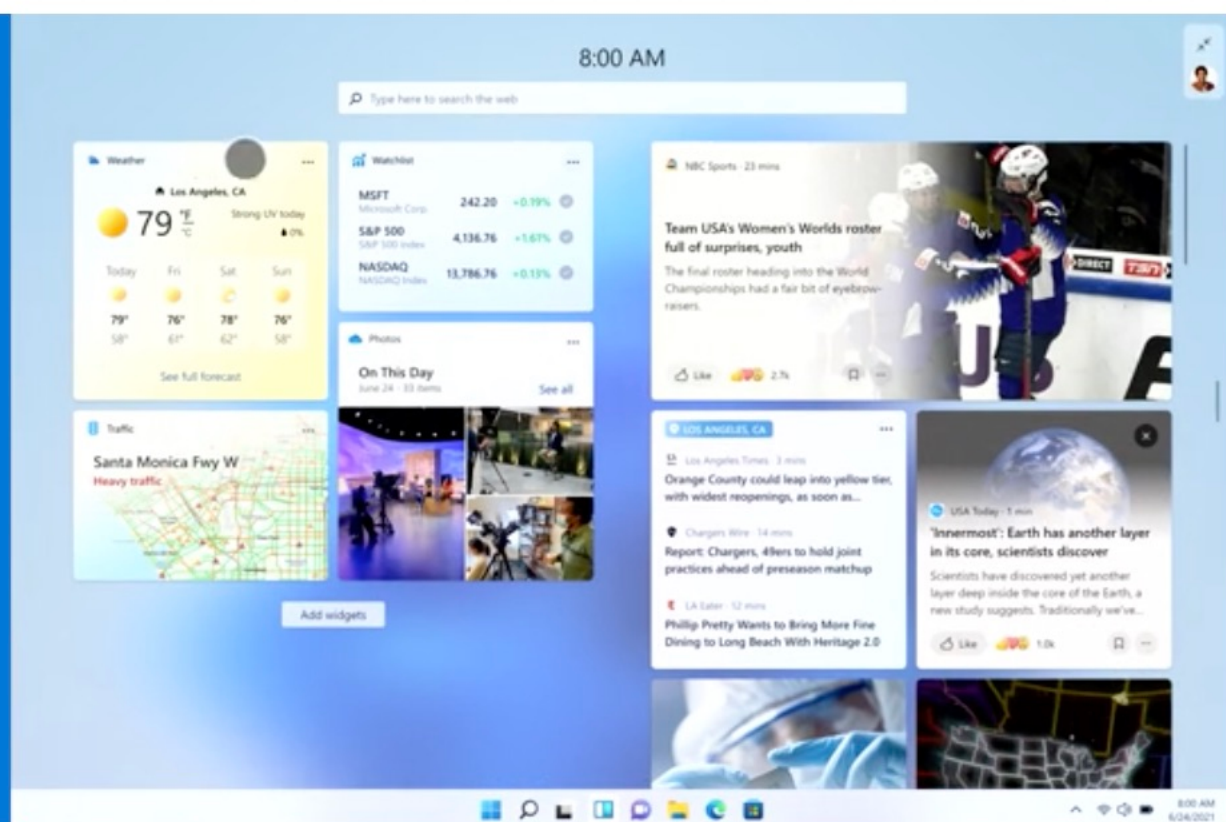

Bringing you closer to what you love also means bringing you closer to the people you love.

With Chat from Microsoft Teams **integrated directly into your Taskbar**, you can instantly **connect** through text, chat, voice, or video with all of your personal contacts—anywhere, no matter the platform or device they're on, across Windows, Android, or iOS ([1](#)).

Your content, curated by you

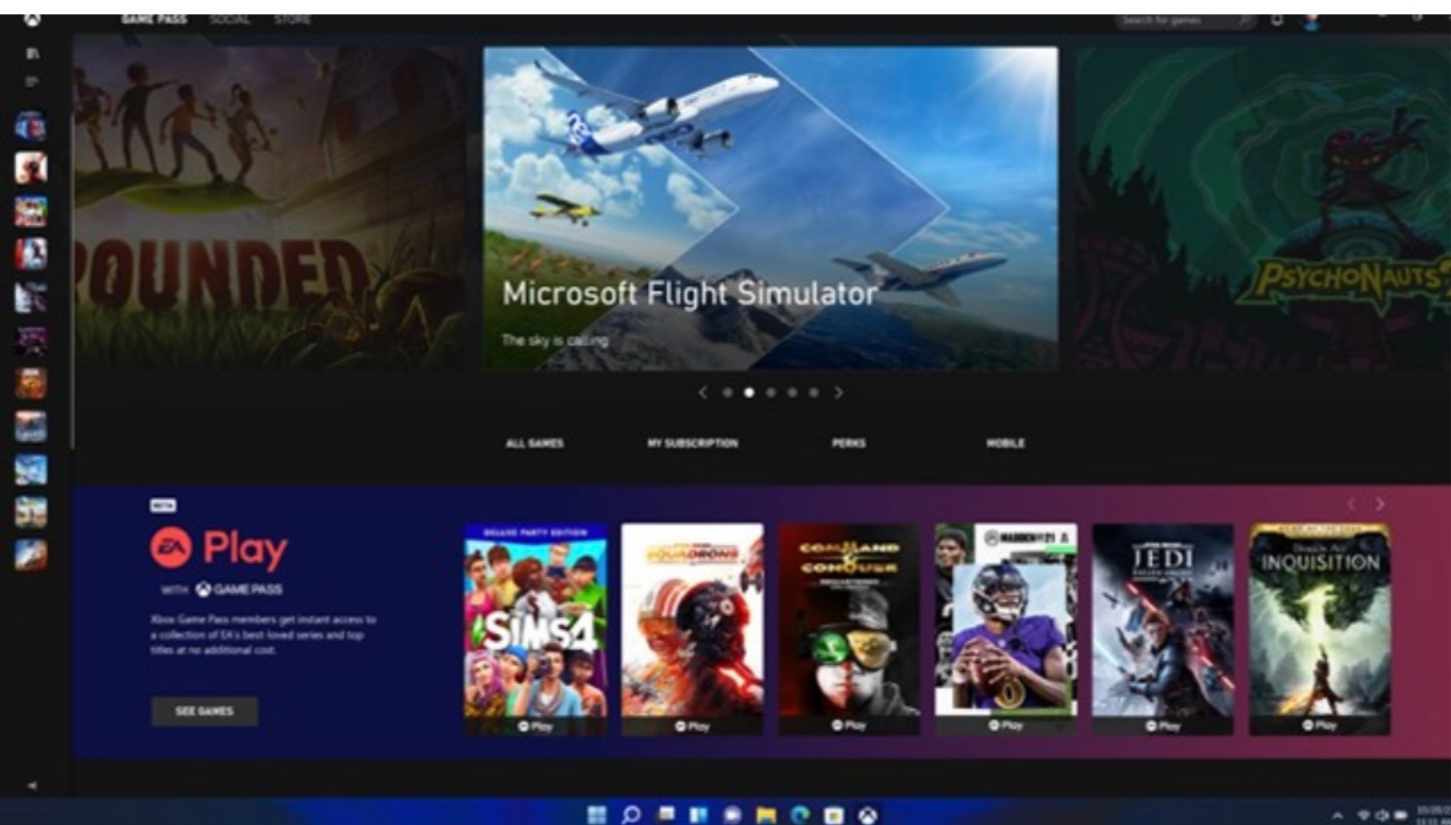

Windows 11 lets you quickly get customized and personalized **access to the news, information, and entertainment** you care about most.

Microsoft Edge and a multitude of AI-powered Widgets **seamlessly integrate** into your desktop and Taskbar to help make it happen.

Play time. Anytime.

Windows 11 unlocks the full potential of your system's hardware so you can play your way. Enjoy **breathtaking immersive graphics** at high frame rates, **faster load times**, and in more detailed game worlds.

And with **Xbox Game Pass for PC or Ultimate** (sold separately), gamers get access to over 100 high-quality PC games with new games added all the time. It's still just as easy to find people to play with, on a PC or console.

Innovation for each of us

With enhancements to **touch**, **Voice Typing**, and **pen inputs**, new Windows 11 devices are more versatile, more capable, and easier for you to use—however you want to use them.

And with the **broadest choice of devices**—across style, features, and form factors—you can **be sure to find the right fit with Windows.**

Get your Windows 11 ready PC

Windows 11 will be available **through a free upgrade for eligible Windows 10 PCs** and on new PCs beginning this holiday.

Does your customer need a PC now? There are still great Windows 10 devices available today.

Use the [PC Health Check app](#) to see if a device meets the requirements to run Windows 11 so your customer can **get a free (2) upgrade when it rolls out.** [Updates vary by device.](#)

Get closer to what you love

With a more simplified, fluid approach, the new Windows 11 **adapts to who you are**, not the other way around.

It's the **most personal Windows ever**—where you can be inspired to create, imagine, connect, and play—all in a familiar place you can call home.
